

# REFRIGERATORS

## Free-Go PLUS

**Free-Go Plus** upright cabinets guarantee the proper storage of all types of ingredients and food to preserve their freshness, quality and always offer safe and tasty dishes.

Designed for a large storage capacity thanks to the ventilated refrigeration system with an evaporator outside the storage compartment, they respond to new market trends: increasingly

eco-friendly, environmentally-sound and energy-saving refrigeration, thanks to the use of natural refrigerant R290.

## FREE-GO PLUS

Insulation thickness

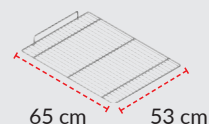

Greater storage capacity thanks to the evaporator outside the inner chamber

Reversible door during on-site installation (except glass door)

LED Lighting and key-operated lock

Mod. ...7 and ...15 grids and trays GN 2/1

## FREE-GO PLUS

More storage volume • More eco-friendly

EX...

One-piece construction internal and external made of **AISI 304 stainless steel**

EF...

One-piece construction internal and external made of **special ANTI-FINGERPRINT steel**

- Storage chamber equipped with shelf supports in AISI 304 stainless steel, 21 levels
- Ventilated cooling system
- Refrigerant fluid: R290
- Evaporator positioned outside the refrigerating chamber with anti-corrosion treatment
- Reliability guaranteed up until room temperature +43°C (5) (except models ...PV)
- Control panel equipped with digital thermometer-thermostat
- Each compartment is delivered as standard with: n. 3 pairs of AISI 304 stainless steel guides and n. 3 plastic-coated grids.

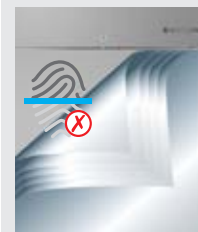

EX7L

EF7T

Special Anti-fingerprint Steel

**Always Clean**

- Fingerprint resistance for easier cleaning and shiny surfaces at all times
- Resistance to corrosion and high temperatures.
