

VOLUMETRIC LITER COUNTER FOR P120SYX SYSTEM

Volumetric water flow meter, for simplified monitoring of the residual capacity of the filter. IPX4 water resistance grade.

Functional features

- For correct operation, the liter-counter turbine must always be in a horizontal position.
- IPX4 water resistance grade.
- Flow rate reading variability: $\pm$ max 5%.
- Flow rate: 10-700 l / h.
- Operating pressure: max 8.6 bar.
- Inlet water temperature: 4-30°C.
- Pressure loss up to a flow rate of 100 l / h: <1.1 bar.
- Inlet and outlet connectors: G 3/4".
- For correct operation, the volumetric measuring turbine must be positioned horizontally.

Technical Data

Dimensions 9,7x3,3x5 cm
