Constructional features

- Free-standing structure with side and bottom panels and doors in AISI 304 stainless steel.
- AISI 304 stainless steel floor of cabinet, reinforced by omega.
- Sink worktop: in pressed AISI 304 stainless steel, with rear splash back in a single piece with the worktop, which is 54 mm thick.
- Side drainer: with press-formed ridges, it slopes to drain water towards the sink and has omega-shaped stainless steel stiffeners.
- Sink: in AISI 304 stainless steel, it is inserted in the worktop by means of a robotic welding and cleaning process.
- A special sound-absorbent material is attached to the underside of each sink.
- Legs: in satin-finish tubular AISI 304 stainless steel, they are 50 mm in diameter. The feet offer height adjustment of +/- 3 cm and shall be fitted with a sole made of thermosetting plastic material.
- The special support-leg fitting system allows placement flush against the wall, even when it is not at a right angle to flooring (distance between leg and wall 33 mm).
- The sandwich-panel sliding doors are suspended on top runner.
- ACCESSORIES: Hot/cold water mixer tap unit or foot control-lever tap, fixed wall shower and trap, drain and overflow assembly.
