

HEAT RECOVERY UNIT - ONLY FOR TRIPLE RINSE MODELS

Heat recovery unit for basket conveyor dishwashers. It uses an efficient system to reduce the amount of water vapor emitted inside the dishwasher: after condensing the steam, the latent heat thus recovered is used to heat the water directed to the dishwasher's boiler. It allows to reduce the installed power by 8 Kw per hour of operation. To be installed on triple rinse dishwashers.

Functional features

- Heat recovery unit for basket conveyor dishwashers.
- It uses an efficient system to reduce the amount of water vapor emitted inside the dishwasher: after condensing the steam, the latent heat thus recovered is used to heat the water directed to the dishwasher's boiler.

Constructional features

- Fan for vapor extraction.
- Three heat exchange coils made of copper; exchange surface 26 m².

Safety equipment and approvals

- CE approvals in respect of all directives and regulations.

Technical Data

Working voltage	400V 3N~ / 50Hz	Net Weight	65 kg
Gross Weight	65 kg
