

HEADER FOR PC50S / PC110S / PC110X CARTRIDGES

Header for PC50S / PC110S and PC110X cartridges.
Rinsing spool valve, by-pass adjustable on 4 positions (0-1-2-3).

Functional features

- The rinsing spool valve is necessary for the correct activation of the resins and for air vent.
- By-pass (mixing mechanism) adjustable in positions 0-1-2-3 according to the quality of the water to be treated. The general indications for setting the by-pass are: Position 0: with very high water hardness (carbonate hardness KH ? 22° dH) and 100% of the filtered water; Position 3: with fresh water (carbonate hardness KH ? 7° dH) and 70% filtered water; Position 1 and 2 in intermediate cases.
